

d. Diversified Services

**d. Diversified Services** is one of metro Detroit's most established technical and administrative staffing companies, as we have been doing contract and direct placements since 1977. Our specialties include: **Office Administration, Engineering, Information Systems, CAD Design, Manufacturing and Legal**. Our process enables us to extract those exceptional candidates who ordinarily would not be "looking" to make a change, candidates who are "buried in excellence." Our goal is to deliver these high-quality individuals to our growing client base. ***Building long-term relationships is what drives our business and our success.***

***As our client,*** you can expect us to personally meet with you at your location. Understanding the technical requirements necessary for any job is not enough. Meeting you allows us to know your personality, your business, your corporate culture, your hiring process and your expectations. This is the first step in ***growing a relationship built on trust and a win-win philosophy.*** We strive to know you! We strive to know your business!

***As our candidate,*** be prepared to "brag" about your accomplishments during an intense face-to-face "innerview" with your recruiter. Today's companies are looking for dynamic individuals who can demonstrate the ability to impact the bottom line. Our clients are looking for results oriented professionals. We also take the time to outline your "realistic" expectations regarding your next job. We talk about your title, your function, your salary requirements, your benefits and the criteria you will be examining before making that final decision to join a new company. We assess your attitude, your enthusiasm, your communication skills, etc. and determine whether or not you are truly geared for growth.

***Our mission*** at d. Diversified Services is to ***provide the finest talent*** to the customers that we serve. The services we offer will not end with the placement, but continue afterwards. Throughout our relationship, you will hear words such as ***professionalism, integrity, and commitment.*** It is our strong belief in these core values that makes us stand out from our competition and provide us with the foundation to build long-term relationships.
